CUSTOM REPORTS GLOSSARY OF TERMS

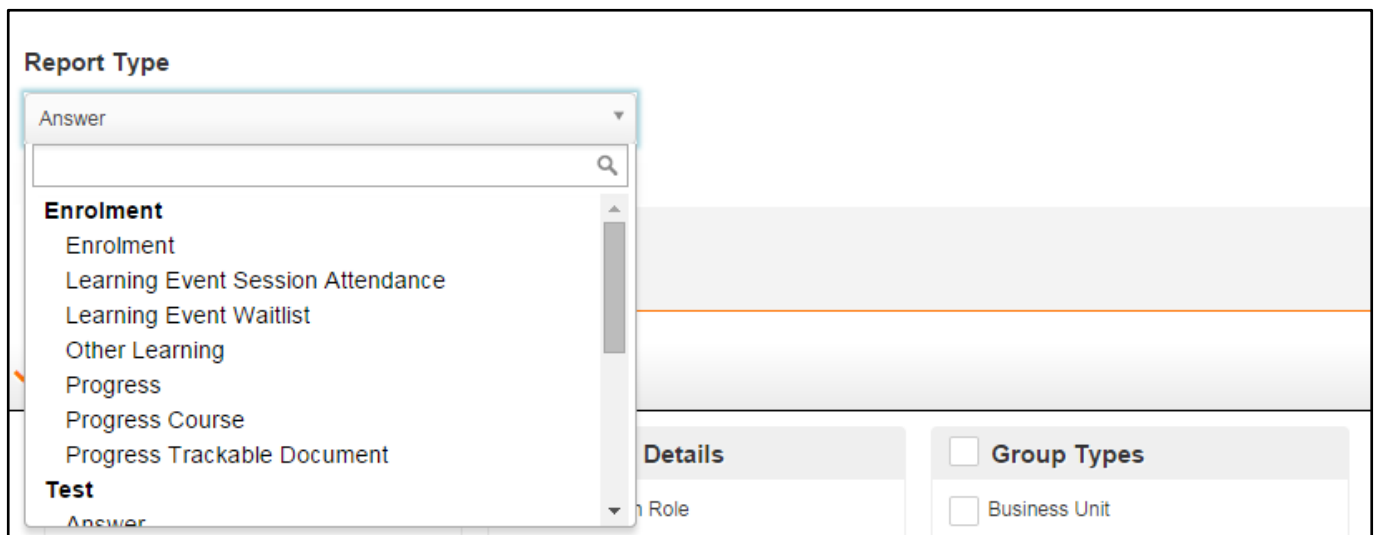

LearnConnect Custom Reports glossary of terms

Hello and welcome to LearnConnect help.

LearnConnect offers powerful reporting capabilities to help you keep track of a vast array of learning activities in your organisation. This glossary has been created to assist in clarifying many of the terms used in the Custom Reports section of LearnConnect.

Which report do I choose?

LearnConnect offers a variety of different report types that can be configured to get exactly the data you're looking for. To help you choose a report type, the table below offers a brief description of each one.

Report Type	Description
Enrolment	<i>Reports in the Enrolment group provide information about users who have been enrolled or waitlisted using LearnConnect's 'Assign Learning' function.</i>
Enrolment	Reports on user enrolments in library items (SCORM Courses, Learning Events, Trackable Documents, etc.) but not on specific items such as Learning Event Sessions or Program Components.
Learning Event Session Attendance	Reports on users' attendance at specific learning event sessions.
Learning Event Waitlist	Reports on users who are currently on a waitlist for specific learning event sessions.
Other Learning	Reports on user enrolments and details (certificate number, etc.) specifically for items that have been created as Other Learning.
Progress	Reports on users' progress in a course – this includes both Library Items and components of programs.
Progress Course	Reports on a user's progress within a course.

Report Type	Description
Progress Trackable Document	Reports on user enrolments and details specifically for Trackable Documents.
Test	<i>Reports in the Test group provide information about specific aspects of any Assessment that has been created using LearnConnect's 'Create Learning' functionality.</i>
Answer	Reports on answers provided by users in assessments and surveys.
Question	Reports on the details of questions contained in an assessment or survey (does not include user responses).
Test Attempt	Reports on a user's attempts for an assessment (i.e. attempt number, score, pass/fail).
User	<i>Reports in the User group allow you to report on any details populated into a user's LearnConnect profile.</i>
Log-on Session	Reports on the details of a user's LearnConnect log-on session (date and duration).
User	Reports on user details including manager, groups, etc.
Other	<i>Reports in the Other group include any that don't require user or enrolment details.</i>
Catalogue Item Learning Asset Link	Reports on the details of any asset that is linked to a given catalogue/library item. For example, SCORM course content and resources (.pdf/.docx) linked to trackable documents.
Group Report	Reports on information associated with any groups set up in the system.
Learning Event Session	Reports on details of specific sessions that have been scheduled for Learning Events (no enrolment data other than number of attendees).
Library Item	Reports on details of Library Items (no enrolment data).

How to use this glossary

To make it easier to find the term you're after, this glossary has been broken into two sections.

If a term is:

- a) Applied consistently across many report types (for example, user details), it will appear in Section 1 – Standard terms
- b) Unique to a particular report or small group of reports, it will appear in alphabetical order in Section 2 – Report-specific terms.

Find = Ctrl F

If you're looking for the definition of a particular term, the easy way to search this document is by pressing the 'Ctrl' and 'F' keys simultaneously on your keyboard, which will launch a small search window at the top right-hand corner of your screen. You can then type the term you wish to search for and press Enter to find its location in the document.

Section 1 – Standard terms

Standard report fields

In this section we will define the various items that can be selected from the Field drop-down list in LearnConnect’s Custom Reports page that are consistent across the majority of report types.

Field	Operator	Value
<div style="border: 1px solid gray; padding: 5px;"> <div style="border-bottom: 1px solid gray; padding-bottom: 5px;">Full Name</div> <div style="border-bottom: 1px solid gray; padding-bottom: 5px;"> <input type="text"/> </div> <div style="padding: 5px;"> <p>User Details</p> <ul style="list-style-type: none"> <input type="checkbox"/> Full Name <input type="checkbox"/> Active <input type="checkbox"/> Clear Text <input type="checkbox"/> Country <input type="checkbox"/> Created <input type="checkbox"/> Date of Birth <input type="checkbox"/> Email <input type="checkbox"/> Password Hash Type <input type="checkbox"/> First Name </div> </div>	=	<input type="text"/>

System Details

- Permission Role
- Groups
- Points

Group Types

- Business Unit
- Client Name
- Contractor Company Name

Add columns to your report

The ‘Select Columns’ area of the reports page allows you to customise your report to show only the information you want to see. You will notice that these items mostly correspond with those in the Field drop-down list. Any selection you make in these checkboxes will create a unique column in your report.

Remember: Selecting a report item from the field list DOES NOT automatically select its corresponding column. Be sure to mark all required checkboxes before you run your report.

Field	Operator	Value
Full Name	=	<input type="text"/>
Date of Birth	=	Const <input type="text"/>

▼ Select Columns

User Details	System Details	Group Types

Definitions of standard report terms

The table below provides a list of terms used across the majority of LearnConnect report types. This glossary provides:

- The reporting term, and
- Its general definition across all applicable report types.

Remember: Press **Ctrl F** if you would like to search for a particular term.

Term	Definition
User Details	<i>Items in the User Details section of the filter drop-down list allow you to refine and populate specific information about the people in your organisation (known in LearnConnect as 'Users') into your report.</i>
Full Name	Displays the user's full name by combining the information from the First Name and Last Name fields in your LearnConnect User database; for example, First Name = John , Last Name = Smith ; therefore John Smith . If the user's profile includes a preferred name, then this becomes Preferred Name + Last Name; for example, Preferred name = Jack ; therefore Jack Smith .
Active	Displays the user's status in LearnConnect. User records are set to a status of Active once they have been set up. You can archive user records; for example, when an employee leaves your organisation. All active users will return a value of 'true', while any archived user will return a value of 'false'.
Clear text	Not in use.
Country	Displays the country in which the user is located (where this has been provided).
Created	Displays the date the user account was created.
Date of Birth	Displays the user's date of birth (where this has been provided).
Email	Displays the user's email address.
en Password Hash Type	Not in use.
Extra Roles	Displays any extra roles that have been assigned to the user; for example, Organisation Administrator, Event Facilitator.
Extra Role Scope	Displays the scope of the extra role; for example, Group, User, Organisation.
First Name	Displays the user's first name (or preferred name where this has been provided).
Gender	Displays the user's gender (Male or Female – where this has been provided).
Identifier	Displays the user's unique identifier. When a user record is created in LearnConnect, it is automatically assigned a unique code called an 'identifier'. LearnConnect uses this identifier to differentiate between different users; for example, if you had two users named John Smith, you could distinguish them via the Identifier.
Image Url	Displays the file path of the user's profile image (where this has been added).
Is Locked	Displays whether the user account is locked. Please note: By default LearnConnect does not lock user accounts for any reason.
Last Active	Displays the date and time the user was last logged on.
Last Logged On	Displays the date and time the user was last logged on.
Last Name	Displays the user's surname/last name.
Mobile	Displays the user's mobile number (where this has been provided).

Term	Definition
Org Unit	Displays the organisation unit name (where this has been configured). If an Org Unit has not been configured, a value of (default) will be displayed.
Organisation	Displays the name of the user's organisation (where this has been configured). If an Organisation has not been configured, a value of (default) will be displayed.
Organisation Unit Identifier	Displays the unique identifier of the user's organisation unit (where this has been configured). If an Organisation Unit has not been configured, a value of (default) will be displayed.
Password	Not in use.
Password Source	Displays the method by which the user's password was generated.
Previous Log On	Displays the date the user last logged on.
State	Displays the state in which the user is located.
Username	Displays the username chosen by/for the user in LearnConnect.
Work Phone	Displays the user's work/office phone number.
System Details	<i>Items in the System Details section of the filter drop-down list allow you to refine and populate specific information about how users' LearnConnect accounts are configured, including their permission levels and the name of their manager, into your report.</i>
Permission Role	Displays the user's permission level in LearnConnect. A user's 'permission role' indicates the level of administrative functionality that is available to the user.
Permission Role Name	Displays the name of any non-standard permission role that has been assigned to the user.
Groups	Displays the number of groups the user belongs to. For example, if a user belongs to two groups, '2' would be displayed in this field.
Points	Displays any CPD (continuing professional development) points that have been assigned to an Enrolment or Catalogue Item.
Manager Username	Displays the Username of the user's manager.
Manager Name	Displays the Full Name of the user's manager.
Custom Attributes	<i>Items in the Custom Attributes section of the filter drop-down list allow you to refine and populate specific information from any custom fields that have been set up in LearnConnect. Custom Attributes are created during the implementation project – see your system administrator for any assistance you may need to define a particular term in this section.</i>
Group Types	<i>Items in the Group Types section of the filter drop-down list allow you to refine and populate specific information about the organisational groups you have set up in LearnConnect. Group Types are set up by your LearnConnect system administrator – see them for any assistance you may need to define a particular term in this section.</i>
Other	
Status	Not in use.
Owner ID	Not in use.

Section 2 – Report-specific terms

Report-specific fields

In this section we will define the various items that can be selected from the Field drop-down list in LearnConnect’s Custom Reports page that are found only in certain report types.

Add columns to your report

The ‘Select Columns’ area of the reports page allows you to customise your report to show only the information you want to see. You will notice that these items mostly correspond with those in the Field drop-down list.

Any selection you make in these checkboxes will create a unique column in your report.

Remember: Selecting a report item from the field list DOES NOT automatically select its corresponding column. Be sure to mark all required checkboxes before you run your report.

Definitions of report-specific terms

The table below provides an extensive list of terms used in specific LearnConnect report types. This glossary provides:

- The reporting term
- The name of the report/s in which the term can be found, and
- The specific definition (contextualised to the report type where necessary).

Remember: Press **Ctrl F** if you would like to search for a particular term.

Term	Report type	Definition
Active Membership Count	Group Report	Displays the number of members with a status of 'active' in the group, i.e. they are current members of the group.
Answer Duration	Answer	Displays the time taken for the user to answer a particular question in an assessment.
Answer is Selected	Answer	Not in use.
Answer Optional Status	Answer	Displays whether the answer has been submitted for manual marking (where this has been configured). If manual marking is not configured, Not Applicable is displayed. The available marking options are: Automatic mode – marks the assessment based on the correct answers for all questions as selected by the administrator. Manual mode – requires a marker to review each of the responses and indicate the result. Mixed mode – allows a combination of Automatic and Manual; for example, setting multiple-choice questions as Automatic and short answer questions as Manual.
Approx Duration (minutes)	Enrolment	Displays the amount of time allocated to the learning activity or the learning event session.
	Learning Event	
	Session Attendance	
Assessment	Library Item	
	Progress	Displays the name of the assessment (if the progress record is for an assessment).
Assessment Event Identifier	Test Attempt	Displays the name of the assessment.
	Answer	Displays the system-generated identifier of the assessment.
Assessment Name	Test Attempt	
Assessment Name	Progress	Displays the name of the assessment.
Bandwidth estimate (kbps)	Log-On Session	Not in use.
Cancelled Date	Enrolment	Displays the date an enrolment was cancelled (if cancelled).
	Learning Event Session Attendance	Displays the date on which the learning event session was cancelled (if cancelled).
Catalogue Item	Enrolment	Displays the name of the catalogue/library item.

Term	Report type	Definition
	Learning Event Session Attendance	Please note: The terms 'catalogue item' and 'library item' are used interchangeably. Both terms refer to the name of an entity in LearnConnect.
Catalogue Item ID	Enrolment	Displays the unique identifier of the catalogue/library item.
	Learning Event Session Attendance	Please note: The terms 'catalogue item' and 'library item' are used interchangeably. Both terms refer to the name of an entity in LearnConnect.
	Progress	
Catalogue Item Name	Enrolment	Displays the name of the catalogue/library item.
	Learning Event Session Attendance	Please note: The terms 'catalogue item' and 'library item' are used interchangeably. Both terms refer to the name of an entity in LearnConnect.
Certificate Number	Enrolment	Displays a certificate code that is auto-generated when an enrolment is completed.
	Learning Event Session Attendance	
	Other Learning	
	Progress	
Code	Answer	Not in use.
Comments	Other Learning	Displays any comments (or 'Learner Submission Notes') entered by the user when completing an Other Learning item.
Completed	Progress	Displays the completion status of the item. Completed = True, not completed = False.
Completed date	Enrolment	Displays the date the enrolment was completed.
	Progress	
	Progress Course	
	Progress Trackable Document	
	Learning Event Session Attendance	Displays the date the learning event session was completed.
Completion	Progress Trackable Document	Displays whether the user has selected the Trackable Document's 'Verification Checkbox'.
Content access period	Library Item	Displays the period of time that the content is available for (where this has been specified).
Custom Payment Group	Learning Event Session Attendance	Not in use.
Date added to waitlist	Learning Event Waitlist	Displays the date the user was added to a learning event's waitlist.
Date Answered	Answer	Displays the date when a specific answer was submitted.
Date Attempted	Answer	Displays the date the user attempted the assessment. Results are shown for each answer submitted in the assessment.
	Test Attempt	
Date Completed	Answer	Displays the date the user completed the assessment (pass or fail). Results are shown for each answer submitted in the assessment

Term	Report type	Definition
	Test Attempt	Currently displays the Date Completed date
Date Last Submitted	Answer	Displays the date on which the answer was last submitted.
Description	Group Report	Displays any free text description that was added to the group details (where this has been provided).
	Progress Trackable Document	Displays the course description for a Trackable Document.
Discipline	Question	Not in use.
Distractor Display Order	Answer	Not in use.
Document URL	Progress Trackable Document	Displays the document's location. This will be either a web URL or a LearnConnect file path (not accessible) depending on how the Trackable Document was configured.
Due date	Enrolment	Displays the enrolment due date (where this has been provided).
	Learning Event Session Attendance	
	Other Learning	
	Progress	
Duration	Log-On Session	Displays the length of time the user was logged on for. The duration is displayed in seconds.
End Date	Learning Event Session	Displays the end date of the enrolment event. For example, if a session went over two days you would use a different end date.
	Learning Event Session Attendance	
Enrolment Completed	Enrolment	Displays the enrolment completion status. Completed = True.
	Learning Event Session Attendance	
Enrolment Date	Enrolment	Displays the date the user was enrolled.
	Learning Event Session Attendance	
Enrolment Method	Learning Event Session Attendance	Not in use.
Enrolment Status	Enrolment	Displays the status of the enrolment (Completed, Not Attempted, Incomplete, Overdue, Failed, Cancelled, Declined, Expired, Pending.)
	Learning Event Session Attendance	
Expiry	Library Item	Displays the expiry option nominated for the Library Item, i.e. 'Completion of this item expires after a period' or 'Completion of this item never expires'.
Expiry Date	Enrolment	Displays the date an enrolment has been marked to expire.
	Learning Event Session Attendance	
	Other Learning	
	Progress	
Explanation of Answer	Answer	Not in use.

Term	Report type	Definition
Facilitators	Learning Event Session	Displays name of any nominated facilitators for the learning event session.
First Visit	Enrolment	Displays the date the user first accessed the Library Item.
	Learning Event Session Attendance	
	Progress	
	Progress Course	
Group Type	Group Report	Displays the name of the group type.
Has Certificate	Library Item	Displays whether a certificate is issued on completion of the Library Item. True = yes.
Has Expired	Enrolment	Displays whether an enrolment has expired. True = expired.
	Learning Event Session Attendance	
Identifier	Group Report	Displays the group's identifier (entered in the Group Identifier field when the group was created).
	Library Item	Displays the library item identifier (entered in the Library Item Identifier field when the Library Item was created).
	Progress Course	Displays the Library Item's unique identifier (entered in the Library Item Identifier field when the Library Item was created).
	Progress Trackable Document	Displays the trackable document's unique identifier (entered in the Trackable Document Identifier field when the trackable document was created).
	Question	Displays the system-generated identifier of the Question.
	Test Attempt	Not in use.
Inactive Membership Count	Group Report	Displays the number of members with a status of 'inactive' in the group, i.e. they are former members of the group that have left the organisation.
Info	Log-On Session	Displays version details of the user's internet browser.
Information	Progress Course	Displays information attached to the Library Item; for example, the Overview of the Library Item (as entered in the Create Learning process).
IP Address	Log-On Session	Displays the user's IP address at the time they were logged into the system.
Issue Date	Other Learning	Displays the date of issue of any official document (selected in the Type drop-down list when creating Other Learning). For example, if a user uploads evidence of a First Aid Certificate, they would enter the date they were issued the certificate and that date would be displayed.
Large Thumbnail URL	Library Item	Displays the LearnConnect file path (not accessible) of the thumbnail image if added when creating a Library Item.
Last Data	Log-On Session	Not in use.

Term	Report type	Definition
Last Recording	Log-On Session	Displays the last recorded action by the user in the system.
Last Visited	Progress Course	Displays the date the course was last visited by any user.
Learning Asset	Progress	Displays the name of the Learning Asset within a Library Item. A Learning Asset contains the resource for the Library Item and is set up to allow you to update the resource (for example, when a small amendment needs to be made to the content) without having to re-enrol your end users.
Learning Asset Description	Catalogue Item Learning Asset	Displays the description of the Learning Asset. A Learning Asset contains the resource for the Library Item and is set up to allow you to update the resource (for example, when a small amendment needs to be made to the content) without having to re-enrol your end users.
Learning Asset Name	Catalogue Item Learning Asset	Displays the name of the Learning Asset. A Learning Asset contains the resource for the Library Item and is set up to allow you to update the resource (for example, when a small amendment needs to be made to the content) without having to re-enrol your end users.
	Progress	
Learning Asset Type	Progress	Displays the type of Library Item. Options are: Other Learning, Learning Event.
Learning Event	Learning Event Session	Displays the name of the Learning Event. A Learning Event is any customised event (such as First Aid Training). The name can be whatever the event is – for example, First Aid Training or Quarterly Sales Training Refresher.
	Learning Event Session Attendance	
	Learning Event Waitlist	
Learning Event Identifier	Learning Event Waitlist	Displays the learning event's identifier (entered in the Learning Event Identifier field when the Learning Event was created).
Learning Event Session Attendance Status	Learning Event Session Attendance	Displays the attendance status of the Learning Event session (Withdrawn, Attended).
Learning Event Session Identifier	Learning Event Waitlist	Displays the system-generated Learning Event Session identifier. Sessions are the specific days that a Learning Event is run. For example, a Learning Event named First Aid Training (which has its own identifier) is run across three sessions. Each of these sessions will have its own identifier.
Leave	Log-On Session	Displays the time the user logged out of the system.
Level Group	Progress	Not in use.
Library Item	Catalogue Item Learning Asset	Name of Catalogue Item. Please note: The terms 'catalogue item' and 'library item' are used interchangeably. Both terms refer to the name of an entity in LearnConnect.
Library Item	Learning Event Session	Displays the name of the Learning Event for that session. For example, 'First Aid Training'.

Term	Report type	Definition
	Learning Event Waitlist	
	Progress	Displays the name of the Library Item
Library Item ID	Learning Event Session	Displays the ID of the Library Item as populated by LearnConnect.
	Learning Event Waitlist	
	Library Item	
Library Item Price	Learning Event Session Attendance	Not in use.
Library Item Status	Library Item	Displays the status of the library item. Statuses include Archived, Available in Library, Draft or Not Available in Library.
Library Item Tags	Enrolment	Displays the tags (or keywords) that have been associated with the Library Item.
	Learning Event Session	
	Learning Event Waitlist	
	Library Item	
Location	Learning Event Waitlist	Displays the nominated location of a Learning Event.
Mark Awarded	Answer	Displays the mark awarded to the user for a given question.
Marker	Answer	Displays the name of the marker for a given question (if answer has been manually marked).
	Test Attempt	
Marker Name	Test Attempt	
Marker Notes	Answer	Displays any notes entered by the marker or any notes regarding the attendance at the Learning Event.
	Learning Event Session Attendance	
Max Attendance	Learning Event Session	Displays the maximum attendance that has been nominated for this session.
Min Attendance	Learning Event Session	Displays the minimum attendance that has been nominated for this session.
Modified On	Library Item	Displays the date the Library Item was last modified.
	Progress Course	
	Progress Trackable Document	
Module	Question	Displays the name of the assessment in which the question appears.
Module Number	Question	Not in use.
Name	Group Report	Displays the name of a given group.
Name	Library Item	Displays the name of the library item.
Notes	Learning Event Waitlist	Not in use.

Term	Report type	Definition
Number Attending	Learning Event Session	Displays the number of attendees that have been registered for the session.
Number on Event Waitlist	Learning Event Session	Displays the number of users on the event waitlist.
Number On Session Waitlist	Learning Event Session	Displays the number of users on the session waitlist.
Org Name	Group Report	Displays the name of the organisation the group belongs to (result will be 'null' where no organisation has been configured).
Org Unit Name	Group Report	Displays the name of the organisation unit the group belongs to (result will be 'null' where no organisation unit has been configured).
Other Learning Created	Other Learning	Displays the date the Other Learning item was created.
Other Learning Name	Other Learning	Displays the name of the Other Learning item, for example 'First Aid Certificate Evidence'.
Other Learning Status	Other Learning	Displays the status of the enrolment in the Other Learning item. Statuses are: Pending Verification, Cancelled, Not Verified, Complete.
Overridden Allowed Duration	Test Attempt	Not in use.
Overridden Player Skin	Test Attempt	Not in use.
Overridden Player Skin Settings	Test Attempt	Not in use.
Overridden Start Window	Test Attempt	Not in use.
Overridden Start date and time	Test Attempt	Not in use.
Overview	Library Item	Displays any text entered in the Overview field of the library item.
Owner Id	Catalogue Item Learning Asset	Displays the system-generated identifier for the owner of the catalogue item.
Parent Links	Answer	Not in use.
Parent Links	Test Attempt	Not in use.
Percent Complete	Progress Course	Displays the completion progress of a program as a percentage.
Percent Complete	Progress Trackable Document	Displays the completion progress of a tracked document as a percentage.
Points	Enrolment	Displays any CPD (continuing professional development) points that have been assigned to the Enrolment.
	Other Learning	
	Progress	
	Progress Course	
	Progress Trackable Document	
Learning Event Session Attendance	Learning Event Session Attendance	
	Learning Event Session Attendance	
Price	Enrolment	Not in use.

Term	Report type	Definition
	Learning Event Session Attendance	
Progress Course Name	Progress Course	Displays the name of the course.
Progress Course Status	Progress Course	Displays the status of the enrolment.
Progress Enrolment Date	Progress	Displays the progress enrolment date.
Progress Status	Progress	Displays the status of the enrolment. Statuses are: Not Started, Completed, Incomplete, Failed, Cancelled, Declined, Pending.
Provider	Enrolment	Displays the name of the Provider nominated for the Learning Event (where this has been provided).
	Learning Event Session Attendance	
	Progress	
Question	Answer	Displays the text for a given question in an assessment.
Question Identifier	Answer	Displays the unique system-generated identifier for each question.
Question No	Answer	Displays the question number of the assessment question, i.e. 1 is for question one, etc.
Question Number	Answer	
Question Part Response Data	Answer	Not in use.
Question Type	Answer	Displays the type of question in an assessment or survey; for example, Multiple Choice or Sequence.
Receipt Number	Learning Event Session Attendance	Not in use.
Re-enrolment Option	Library Item	Displays the re-enrolment option nominated for the Library Item; for example, Allow re-enrolment after a period, Allow re-enrolment at any time.
Re-enrolment Period	Library Item	Displays the re-enrolment period as specified in the Edit Library Item page (in days, weeks or months). If not specified, it will display '(not specified)'.
Registration Closed	Learning Event Session	Displays the nominated date that registration is closed for the session.
	Learning Event Session Attendance	
Registration Open	Learning Event Session	Displays the nominated date that registration is opened for the session.
	Learning Event Session Attendance	
Rowguid	Learning Event Session	Not in use.
	Learning Event Waitlist	Displays the system-generated identifier for the given Learning Event.
Score	Test Attempt	Displays the user's test score on the current attempt.
Score Raw	Enrolment	Displays the score achieved by the user on a learning item. This will vary depending on the type of item and
	Progress	

Term	Report type	Definition
	Progress Course	how it has been configured. For example, an Assessment may return '20' meaning 20 marks, whereas a Library Item may return '70', and it could mean either 70% or 70 marks depending on how it was configured.
	Learning Event Session Attendance	Not in use.
Score Scaled	Enrolment	Displays the score out of 100%.
	Progress	
	Progress Course	
	Learning Event Session Attendance	Not in use.
Screen Resolution	Log-On Session	Displays the screen resolution of the user's monitor.
Section Identifier	Answer	Displays the system-generated identifier for a specific test section.
Section Name	Answer	Displays the name of the section. System-generated options are: Introduction, Exit if passed, Exit if Failed. If no user-configured section names have been configured, these will display as Section 1, Section 2, etc.
Section Order	Answer	Displays the number of the question in a given assessment section (returns the same value as question no.).
Sequence	Progress	Displays the sequence number of an assessment or survey.
Server Name	Log-On Session	Not in use.
Session Date	Log-On Session	Displays the date and time of a user logged on to the system.
Session ID (System Generated)	Learning Event Session	Displays the system-generated identifier of the Session.
	Learning Event Session Attendance	
Session Origin	Log-On Session	Not in use.
Small Thumbnail URL	Library Item	Displays the location of the image if a Thumbnail is uploaded when creating a Library Item (not accessible).
Start date	Enrolment	Displays the date an Enrolment was delivered to the user.
	Progress	
	Learning Event Session	Displays the start date of the learning event session
	Learning Event Session Attendance	
Start date time	Learning Event Waitlist	Displays the start date of the session (blank for event).

Term	Report type	Definition
Status	Answer	Displays the user's result for each question. Options are: Pass, Fail.
	Learning Event Session	Displays the session status. Statuses are: Setup, Published, Archived, Completed, Cancelled.
	Progress Trackable Document	Displays the enrolment status for the trackable document. Statuses are: Not Attempted, Completed.
	Question	Not in use.
Test	Answer	Displays the name of the Assessment. The terms 'Test' and 'Assessment' are used interchangeably in LearnConnect.
	Test Attempt	
Test Attempt	Answer	Displays the number of times the user has attempted the assessment.
	Enrolment	
	Learning Event Session Attendance	Not in use.
Test Attempt Identifier	Answer	Not in use.
Test Attempt Origin	Test Attempt	Not in use.
Test Attempt Status	Test Attempt	Displays the status of the test. Statuses are: Passed, Failed, Open, Marked, Marking.
Test Attempts	Progress	Displays the number of times a user has attempted an assessment (if progress record is an assessment).
Test Duration	Test	Displays the duration of the test (where this has been entered in Library Item settings).
	Answer	Displays how long it took the user to complete the assessment.
	Test Attempt	
Test Identifier	Answer	Displays the system-generated identifier of the assessment.
	Test Attempt	
Test Name	Answer	Displays the name of the assessment.
	Test Attempt	
Time Spent	Enrolment	Displays the time the user spent in a given course.
	Progress	
	Progress Course	
	Learning Event Session Attendance	Not in use.
Time Zone	Learning Event Session	Displays the nominated Time Zone selected for the Learning Event session
	Learning Event Session Attendance	
	Learning Event Waitlist	
Total Mark	Test Attempt	Displays the total marks of the assessment.
Trackable Document Name	Progress Trackable Document	Displays the name of the trackable document.
Trackable Documents Status	Progress Trackable Document	Displays the status of the trackable document. Statuses are: Completed, Not Attempted.

Term	Report type	Definition
Training Venue	Learning Event Session	Displays the nominated Venue of the Learning Event.
	Learning Event Session Attendance	
	Learning Event Waitlist	
Training Venue Location	Learning Event Session Attendance	
Type	Question	Displays the question type chosen for the assessment; for example, multiple choice.
Visits	Enrolment	Displays the number of times a course has been launched by users.
	Progress	
	Progress Course	
	Learning Event Session Attendance	Not in use.
Waitlist Type	Learning Event Waitlist	Displays whether the user is on a waitlist for a Learning Event or a particular session of that event. Types are: session, event.
